

TECHNICAL BULLETIN

TRAILER AIR SUSPENSION NEW TRI-FUNCTIONAL² II BUSH IMPROVEMENT

No: TRAILER AUS-008
Subject: *Product Update*
Date: August 1997 **Revision:** A

Description

As part of our continuous product improvement efforts, Hendrickson Trailer Suspension Systems is introducing the new Tri-Functional II Bushing (Part No. C-21824) for all suspensions. The Tri-Functional II Bushing extends the bushing life by incorporating a change in the configuration of the void area, while keeping material composition the same. Fitment of the new bushing (pictured above) will remain the same as the current Tri-Functional Bushing (Part No. C-3558). Phase in of the bushing to product line is as follows:

Intraax	Current
HT Underslung product	Current
HT Top Mount product	Current

The new Tri-Functional II Bushing and the current bushing should not be mixed on axle positions. Bushings should be replaced by axle sets.

All current bushing kits will be changed to include the new Tri-Functional II Bushing, but the kit numbers will remain the same.

If any further installation detail or assistance is required, contact the Hendrickson Customer Service Department on (03) 9767 3400
