

TECHNICAL BULLETIN

HT SERIES TRAILER AIR SUSPENSION TECHNICAL BULLETIN INTRODUCTION

No: TRAILER AUS-001
Subject: *Publication Update*
Date: May 1996 **Revision:** A

Description And Explanation

As part of our commitment to continuous improvement, Hendrickson has fully revised the Truck and Trailer Technical Bulletin system. Previously updates were provided in the form of technical drawings and product updates.

Two sets of Technical Bulletins will now be issued on an ongoing basis beginning with this one. Truck and Trailer Bulletins will be issued separately according to their own sequential numbering system. A brief explanation of this system is depicted in the example title block shown above.

Previous Product Updates should not be discarded, but filed separately. Truck and Trailer Bulletins should also be filed separately and sequentially according to the issue number.

If you encounter any difficulties or require further issues of Hendrickson Technical Bulletins, contact the Hendrickson Customer Service Excellence Centre on (03) 9767 3400.
